## PLEASE SEE ATTACHED BOOKLET FOR DETAILED DIRECTIONS FOR USE AND INSTRUCTIONS

### GENERAL INSTRUCTIONS

GROWTH B&B MARINE is a liquid fertiliser manufactured from Ovine blood and bone, plus trace elements and minerals with a balanced N:P:K of 10:4:7. Due to the organic nature of GROWTH B&B MARINE, the analysis may vary from time to time. The organic materials feed and nurture the microbiological activity in the soil increasing nutrient cycling, bacterial and fungal activity and feeding earthworms thereby increasing the availability of important nutrients, trace elements and minerals.

- Ensure spray equipment and product handling equipment is clean and not contaminated with products likely to cause crop injury when mixed with GROWTH B&B MARINE. ALWAYS USE CLEAN WATER.
- Replace cap/bung carefully after use to protect contents and add Growth B&B to the mix or spray vat through a filter basket.
- Apply only when diluted with water as directed. When mixing with other products, check compatibility first and always add GROWTH B&B MARINE last and stir or agitate thoroughly before use. (see AGITATION INSTRUCTIONS in attached booklet )
- Fine filters may need to be removed before use. Material has been screened through a 60 mesh filter. Maximum particle size should be less than 0.25 mm (250 microns.)
- Material is harmless to birds, bees and animals when used as directed.
- The application rates may be varied according to soil fertility levels, fertiliser history, location, climate and the requirement of any farm or crop. For further advice contact GROWTH AGRICULTURE Pty Ltd on FREECALL 1800 440 438.

### COMPATIBILITY:

GROWTH B&B MARINE mixes well with most spray chemicals, but ALWAYS TEST FOR COMPATIBILITY FIRST.

### APPLICATION INSTRUCTIONS

At the time of manufacture, Growth B&B Liquid Blood and Bone is sieved through a **60 mesh (So the Maximum Particle size is 250 micron)** screen any attempt to apply the product through nozzles or filters which are finer than this may result in equipment blockage.

When applying Growth B&B through commercial ground applied equipment follow the procedures below;

1. Remove Nozzle Filters
2. Use 50 mesh (297 micron) in line filters or larger
3. Use Nozzles rated at .3 gal per minute (TEEJET 003 equivalent) or larger.
4. Always add Growth B&B to the tank mix last
5. Ensure good agitation of the tank mix at all times

### SAFETY DIRECTIONS:

Wash hands after use. Avoid contact with skin and eyes. DO NOT SWALLOW.

### FIRST AID:

For advice contact a Poisons Information Centre (Phone 131126) or a doctor immediately.

### MATERIAL SAFETY DATA SHEET:

Additional information is listed in the Material Safety Data Sheet

### CAUTION:

Always test for compatibility. GROWTH B&B MARINE is made using blood and bone sourced from deep sea fishing operations and is suitable for use in pastures.

### CONDITIONS OF SALE:

GROWTH AGRICULTURE PTY LTD shall not be liable for any loss, injury or damage whether consequential or otherwise, whatsoever or howsoever arising, whether through negligence or otherwise in connection with the sale, supply, use or application of this product.
